

Install ZenHub Enterprise

Help@IBM

Install ZenHub Enterprise

ZenHub is a project management tool that adds track and plan capabilities to the GitHub interface, including a Kanban view of GitHub issues, epics, and burn down charts.

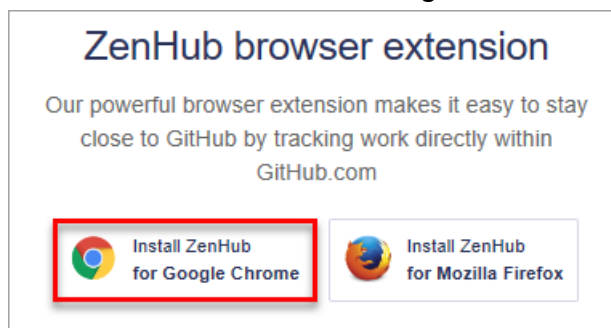

Select your browser and complete the steps to install and set up the ZenHub browser extension:

- [Google Chrome](#)
- [Mozilla Firefox](#)

Google Chrome ZenHub Browser Extension

Complete the following steps to install the ZenHub browser extension for Google Chrome:

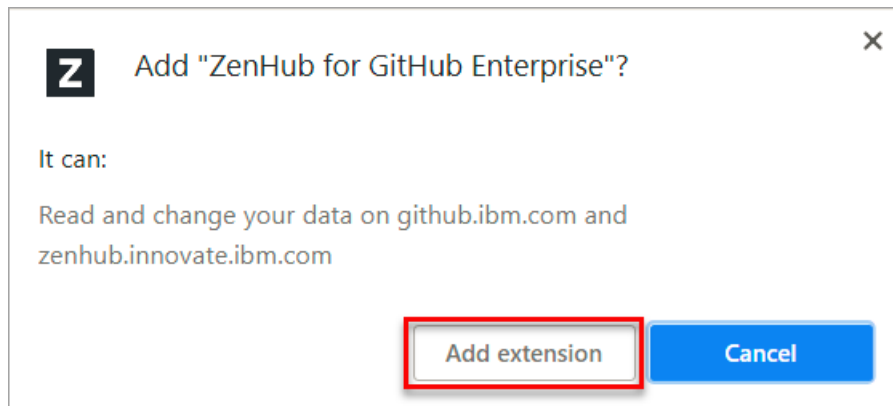

1. Copy and paste this ZenHub URL into a Google Chrome browser: <https://zenhub.ibm.com/setup/download>.
2. Click "Install ZenHub for Google Chrome."

3. The ZenHub for GitHub Enterprise window appears. Click + ADD TO CHROME in the upper-right of the window that opens.

4. Click "Add extension" on message that says "Add ZenHub for GitHub Enterprise?"

After you successfully add the extension, the ZenHub for GitHub Enterprise icon appears on the top-right of your browser window.

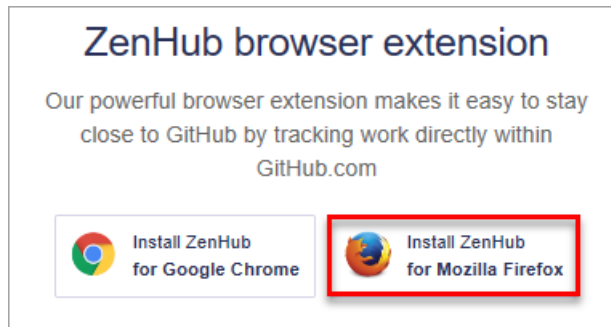

5. Click the Z icon and sign in with your GitHub account.

Mozilla Firefox ZenHub Browser Extension

Complete the following steps to install the ZenHub browser extension for Mozilla Firefox:

1. Copy and paste this ZenHub URL into a Google Chrome browser: <https://zenhub.ibm.com/setup/download>.
2. Click "Install ZenHub for Mozilla Firefox."

3. A message appears asking you to allow Firefox to install software on your computer. Click Allow to download the ZenHub add-on.

4. Click Add to give permission for ZenHub to access your data.

The ZenHub for GitHub Enterprise icon appears on the top-right of your browser window.

5. Click the Z icon and sign in with your GitHub account.
